Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. Claims 1 and 3-11 are objected to because of the following informalities: Claim 1 is objected for a lack of antecedent basis in line two of "the lengthways direction". Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 1, 2, and 4-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cunniff in view of Bremer.

The device as claimed is substantially disclosed by Cunniff having a scale 16 and scale reader 22 with the scale having a plurality of reference marks 12 that are matched with a previously stored pattern and reference signal output, but lacks reference marks being spaced

apart in a lengthwise direction and the reference marks being specifically arranged in a random or pseudo-random pattern. Bremer teaching using a linear absolute track that is distributed in a pseudo-random pattern to locate a desired location on a linear scale. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the scale of Cunniff in a linear manner as taught by Bremer to use the scale in a desired orientation in an old and well known linear orientation. Therefore, it would also have been obvious to one of ordinary skill in the art at the time the invention was made to set the spacing of the reference marks of Cunniff in a random or pseudo-random manner as taught by Bremer to locate a desired specific location along the scale by setting a reference mark at the desired location.

Allowable Subject Matter

5. Claims 3 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
